

Lars Bergman

Principal Backend Engineer

lars.bergman@example.com · +46 8 987 65 43 · Stockholm, Sweden

SUMMARY

Experienced backend architect specializing in high-traffic, low-latency services for streaming and fintech platforms.

EXPERIENCE

Principal Backend Engineer — Spotify

2020–Present

- Designed a microservice handling 50K RPM for personalized playlists, cutting latency from 120ms to 45ms.
- Introduced contract-testing (Pact) reducing integration bugs by 35% in CI pipeline.

Senior Backend Engineer — Klarna

2016–2020

- Built a real-time fraud detection engine using Go and Redis, processing 2M transactions/day.
- Led migration from monolith to Kubernetes-based platform, decreasing release cycle from bi-weekly to twice-weekly.

EDUCATION

M.Sc. Computer Science

KTH Royal Institute of Technology · 2016

SKILLS

Go Java Kubernetes AWS gRPC

Protocol Buffers

Observability (Prometheus, Grafana)

Python
