

Aisha Karim

Software Engineer (Principal)

aisha.karim@example.com · +31 6 12345678 · Amsterdam, Netherlands

SUMMARY

Principal software engineer with extensive experience designing resilient, cloud-native micro-services. Strong advocate for automation, observability, and mentorship.

EXPERIENCE

Lead Software Engineer — NexusTech Amsterdam

2016-Present

- Architected a Kubernetes-based platform serving 10+ micro-services, handling 5K RPM.
- Introduced GitOps workflows with ArgoCD, cutting release lead time from days to hours.
- Mentored a team of 6 engineers, fostering a culture of test-driven development.

Senior Engineer — CloudSolutions Eindhoven

2012-2016

- Developed a high-throughput payment processing service in Java (Spring Boot).
- Implemented centralized logging and tracing with ELK stack.
- Contributed to open-source library for secure token handling.
