EXPERIENCE

Senior Software Engineer — TechNova Solutions Jan 2020 – Present

- Designed and implemented RESTful APIs serving 2M+ daily requests using Python (FastAPI) and PostgreSQL.
- Led a team of 5 engineers in migrating monolithic application to Kubernetes-based microservices, reducing latency by 35%.
- Instituted code review standards and CI/CD pipelines with GitHub Actions, increasing deployment frequency from weekly to daily.

Software Engineer — CodeCraft GmbH Mar 2016 – Dec 2019

- Developed data processing pipelines in Python (Pandas, Dask) for financial analytics, cutting processing time by 40%.
- Collaborated with UX team to integrate frontend features using React.

Junior Developer — StartupHub Jun 2014 – Feb 2016

- Built internal tools using Java and Spring Boot; participated in agile sprints.
- Contributed to CI pipeline improvements using Jenkins.

EDUCATION

B.Sc. Computer Science

Universitat Politècnica de Catalunya (UPC) · 2014
