SUMMARY

Principal Software Engineer with over 12 years of experience architecting high-performance, cloud-native systems; expert in Python, Go, and Kubernetes; strong track record of leading engineering teams and driving technical strategy.

EXPERIENCE

Principal Software Engineer — CloudForge Ltd. Jan 2019 – Present

- Designed a multi-tenant SaaS platform serving over 500 K active users, built on Python (FastAPI) and Go microservices, deployed on AWS EKS.
- Instituted observability stack (Prometheus, Grafana, Loki) reducing mean time to detect incidents by 40%.
- Grew backend team from 4 to 12 engineers, established career ladder and mentorship program.

Senior Backend Engineer — NovaTech Solutions Mar 2013 – Dec 2018

- Developed real-time analytics pipeline processing 2 M events/day using Python (Pandas, Kafka Streams) and Redshift.
- Led migration from monolithic Java application to containerized microservices, improving deployment frequency from monthly to weekly.
- Implemented automated testing suite (pytest, Jest) achieving 85% code coverage.

Backend Engineer — TechSolutions UK Sep 2011 – Feb 2013

- Maintained legacy payment processing system in Java; resolved critical bugs reducing downtime by 30%.
- Built internal tooling for log aggregation using Python and Elasticsearch.

EDUCATION

M.Sc. Computer Science

Imperial College London · 2013

B.Sc. Computing

University of Bristol · 2011
