

Erik Lundstrom

Lead Software Engineer (Principal)

erik.lundstrom@example.com · +46 8 777 88 99 · Sztokholm, Szwecja

SUMMARY

Principal software engineer with 10+ years of experience building high-performance, cloud-native systems. Expert in distributed architectures, performance tuning, and technical leadership across multicultural teams.

EXPERIENCE

Principal Software Engineer — NordicLogic

Jun 2020 – Presente

- Archiwected a micro-services platform handling 15k RPS using Go, gRPC, and Istio service mesh.
- Reduced infrastructure costs by 30 % through rightsizing Kubernetes clusters and spot-instance utilization.
- Established a guild for observability, introducing OpenTelemetry and Grafana dashboards adopted organization-wide.

Senior Software Engineer — AuroraTech AB

Mar 2015 – Maj 2020

- Led migration of monolithic legacy system to event-driven architecture (Kafka, Spring Boot).
- Implemented automated performance regression suite cutting mean release-cycle defects by 40 %.

Software Engineer — CodeCraft Studios

Sep 2012 – Lut 2015

- Developed real-time analytics dashboard using Node.js and React.
- Contributed to open-source library for JWT validation, gaining 1.2k stars on GitHub.

Intern — TechStart Inc.

Lato 2012

- Assisted in building internal ticketing tool (PHP, MySQL).
- Gained full-stack exposure and agile scrum basics.

EDUCATION

M.Sc. Computer Science

KTH Royal Institute of Technology · 2012

B.Sc. Software Engineering

Lunds Universitet · 2010

SKILLS

- Go Python Java Kubernetes
- Docker gRPC Istio Kafka
- Terraform CI/CD (GitLab, Jenkins)
- Observability (Prometheus, Grafana)

LANGUAGES

- Svenska — Natywy
- Engelska — Fluent
