SKILLS

Python (pandas, PySpark)
SQL
Apache Airflow
Kafka
AWS (S3, Glue, Redshift)
Docker
Git

LANGUAGES

Swedish — Native
English — Fluent

SUMMARY

Seasoned data engineer specializing in building reliable ETL pipelines, data warehousing, and real-time streaming solutions using Python, Spark, and cloud platforms.

EXPERIENCE

Senior Data Engineer — NordicData Labs 2020-Present

- Architected a serverless data lake on AWS (S3, Glue, Athena) cutting storage costs by 22%.
- Developed PySpark jobs processing 5TB/day of click-stream data with <5% latency SLA breach.
- Mentored 4 junior engineers, establishing code review standards that reduced production incidents by 30%.

Data Engineer — SkyNet Analytics 2017-2020

- Built real-time pipeline using Kafka Streams and Python for fraud detection, improving detection speed from 15min to <30sec.
- Designed star schema in Redshift supporting self-service BI for marketing team.

ETL Developer — DataBridge AB 2015-2017

- Migrated legacy Informatica workflows to Python-based Airflow DAGs, increasing job success rate from 88% to 99%.
- Implemented data quality tests using Great Expectations.

EDUCATION

M.Sc. Computer Science

KTH Royal Institute of Technology · 2015
